I was required to read Long Walk to Freedom for a class in school. I had heard from students who were previously required to read the book that it was too long, and very bad. I did not go into this book with high expectations, which made Long Walk to Freedom a pleasant surprise. Written by Nelson Mandela over the course of several years, beginning with a first draft written in prison (which was lost to authorities), the book covers each stage of Nelson's life. Beginning with his early

childhood in an African tribe, through his education and career as one of the first black lawyers of Africa, and eventually his decision to join the famed political party, the African National Congress, where Nelson began his struggle for equal rights for his people. From there Nelson goes on to describe his life fighting for the freedom of the native people of Africa. Harassed and 'banned' by the authorities for his actions, Mr. Mandela's struggle is not an easy one. He would be put on trial three separate times for crimes stemming from his political views, his third trial landing him a life sentence. But with Nelson's natural resiliency in bad situations, and nations all over the world calling for his release, he did not fear spending the rest of his life in prison. His years spent in prison would be long and hard, but he knew upon his release that the long walk to freedom would near an end. The Autobiography of Nelson Mandela is written well, and its length is not of issue, especially when taking into account how expansive the story of his life really is. The pacing of the story is actually very well done, years are written away in a few pages without anything seeming to be missed.
