I am a Video Editor and After Effects Artist, but while I did study After Effects in college, I never used it in my career until recently. At my job, I was given tasks that required minimal After Effects knowledge. However, recently, I have been put to the task of more complicated work. Each time, I have been able to find a tutorial and seek help on forum boards or from co-workers. However, I really am tired of that. When I am given an advanced project, I am stressed, seeking an answer sometimes through the night or weekend. I am embarrassed to have to ask co-workers, and sometimes a tutorial does not address an issue that's tripping me up. So I seriously considered giving up on After Effects, but almost everyone wants an editor who knows After Effects now. In college, this book was our textbook. Now as a working professional, I have purchased it again for myself. But now, there are a ton of After Effects VIDEO tutorials. I have gone through the Essentials training on Lynda.com and Total Training. Those are as close to a textbook as you will find, but they are fundamental. For cool stuff, I love Video Copilot, AE Tuts and others. But what I have found is that those tutorials to do 'cool' things are simply 'watch what I can do' videos by the artists. This book is so detailed that I understand why it was a textbook in college. You really LEARN After Effects. I am now at a place where I am not going to watch some tutorial, make some eye candy motion graphic and toss it on my reel as if I am at a level I'm not at. I now want to really learn the ins and outs of this app, and this book will do that. I advise those who are anxious to jump on YouTube and follow someone's advanced video tutorial, then claim to know After Effects to sloooow down.
