Black Pioneers Of Science And Invention

Synopsis

A readable, perceptive account of the lives of fourteen gifted innovators who have played important roles in scientific and industrial progress. The achievements of Benjamin Banneker, Granville T. Woods, George Washington Carver, and others have made jobs easier, saved countless lives, and in many cases, altered the course of history. Includes a bibliography and an index.

Customer Reviews

Early contributors to scientific and industrial progress faced numerous obstacles such as scarce financial resources and slow communication options as they designed new machines, medicines, procedures, and equipment. Black Americans saw additional adversity in the form of discrimination and legal restrictions by race as they engaged in their work. Louis Haber carefully documents the challenges and accomplishments experienced by fourteen black American inventors as they made important contributions to science and industry during the nineteenth and twentieth centuries. First featured in this book is Benjamin Banneker, a mathematician and surveyor who made the first clock ever built in the United States, prepared a set of almanacs based on his own calculations that became a household staple, and completed the surveying plans for the new capital of Washington DC. Subsequent chapters cover Norbert Rillieux, who invented the vacuum pan evaporator to make white refined sugar crystals; Jan Earnst Matzeliger, who designed and built the first shoe-lasting machine that revolutionized the automation of shoe production; and Elijah McCoy (the person behind the expression "It's the real McCoy), whose inventions in lubricating machinery were used on all railroads in the western U.S. and on all steamers on the Great Lakes. The book further

includes chapters covering the contributions of Granville T. Woods (the "Black Edison" who made numerous discoveries related to electrical systems and devices, such as railway telegraphy); Lewis Howard Latimer (whose work led to innovations in the electric lamp industry); Garrett A.
